Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 12-15, drawn to a fixation device for fixing a first member in a position relative to a second member.

Group II, claim(s) 6-11, drawn to a method for fixing a first member in a position relative to a second member.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II include the following common technical features: a shaft having a head, a first screw portion, and a second screw portion wherein said first and second screw portions have an external screw thread configured to engage a bore. These are not considered to be special technical features in the context of the independent claims taken as a whole in view of US 5,827,285 (cited by applicant), which discloses a shaft having a head 40, a first screw portion 20, and a second screw portion 30 wherein said first and second screw portions have an external screw thread (22 and 32) configured to engage a bore.

Art Unit: 4111

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Set 1 - Shaft and second screw portion connection

- Species A - Special technical feature, representative Fig 5a; Shaft and second screw portion maintained with a lock nut;
- Species B - Special technical feature, representative Fig. 9; Shaft and second screw portion are integral;

Set 2 - Shaft Head

- Species X - Special technical feature, representative Fig. 3; Smooth shaft head
- Species Y - Special technical feature, representative Fig. Fig 9; Threaded shaft head

Applicant is required, in reply to this action, to elect a **single species from each set of species** to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 4111

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A - Claims 2 and 6-11

Species B - Claim 5

Species X - none

Species Y - Claims 1-5 and 9-15

The following claim(s) are considered to be generic:

Set 1 - Claims 1, 3, 4, and 12-15

Set 2 - Claims 6-11

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species in set 1 are mutually exclusive and the species in set 2 are mutually exclusive.

6. Telephone calls were made to the attorney of record, Charles Ruggiero, on 05 December 2007, 07 December, 2007, and 03 January 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
